

Plastic coated wire: PVC coated iron wire

PVC coated iron wire (referred to as: PVC wire, PE wire)

The product uses high quality galvanized wire as material. Through the deep processing, the plastic and galvanized wire is made into a solid combination with anti-aging, anti-corrosion aging property. It can be used several times longer than hot and cold galvanized iron wire.

It can be customized according to user's needs.

Material: PE, PVC material, anti-UV, anti-aging additives that can be added.

Varieties:black iron wire, galvanized wire, stainless steel wire, copper wire.

Category:dark green, bright green, white, black, and so on.

Specifications:Diameter 0.5mm-4mm outer diameter 1.0mm-5.0mm

Packing: according to customer requirements for packaging

Wire filament number	Wire core diameter mm	plastic coated wire diameter mm	Color
8#	4.06	4.99mm	According to customer requirements
10#	3.25	4.15mm	According to customer requirements
12#	2.64	3.20mm	According to customer requirements
14#	2.03	2.60mm	According to customer requirements
16#	1.63	2.00mm	According to customer requirements
18#	1.22	1.52mm	According to customer requirements
20#	0.91	1.20mm	According to customer requirements

22#	0.71	1.00mm	According to customer requirements
24#	0.56	0.86mm	According to customer requirements
26#	0.46	0.70mm	According to customer requirements
28#	0.375	0.68mm	According to customer requirements
30#	0.315	0.60mm	According to customer requirements
33#	0.250	0.50mm	According to customer requirements
35#	0.210	0.45mm	According to customer requirements
Special custom specifications			

Uses: Widely used in animal breeding, agriculture, forestry protection, aquaculture, parks, zoo fence, stadium, etc., and its anti-corrosion, anti-aging with longer service life than the average
